

Flat Webbing Sling

These flat webbing slings are designed for lifting heavy loads. They are constructed from durable synthetic materials and feature reinforced loops for secure attachment.

Product Overview

High-Strength Flat Webbing Sling

These flat webbing slings are designed for lifting heavy loads with superior strength and flexibility. Constructed from durable synthetic materials, they offer a safer and more manageable alternative to traditional chain or wire rope slings. The flat design ensures even load distribution, protecting delicate surfaces from damage during lifting operations.

Technical Specifications

Material	Synthetic
End Attachment	Reinforced loops

Compliance & Safety

Compliance	Industry Safety Standards
