

Flexible LED Strip Light

Flexible LED strip lights provide versatile illumination for various applications. They feature low power consumption, high brightness LEDs, and a flexible circuit board for easy installation.

Product Overview

Flexible LED Lighting Solution

This flexible LED strip light is designed for versatile illumination in various indoor and accent lighting applications. Featuring 30 high-efficiency 2835 SMD LEDs per meter, it offers reliable brightness with low power consumption. The unit is conveniently powered by a 3xAA battery box, ensuring portability and ease of installation without the need for complex wiring.

Technical Specifications

LED Type	2835 SMD
LED Density	30 LEDs/m
Strip Length	1 m
Lead Wire Length	30 cm

Power & Operation

Power Source	3x AA Batteries
Portability Features	Battery Operated, Flexible Circuit, Easy Installation
