

Floor-Standing Home Theater Speakers

These floor-standing speakers are designed for high-fidelity audio reproduction in home theaters. The multi-driver configuration delivers a balanced soundstage with clear highs, detailed midrange, and deep bass response.

Overview

High-Fidelity Audio Experience

These floor-standing speakers are engineered for superior audio reproduction in stereo or home theater setups. Built with a high-density MDF enclosure, the design minimizes unwanted resonance to ensure accurate, clear sound. The multi-driver configuration delivers a balanced soundstage with crisp highs, detailed midrange, and deep bass performance.
