

Floor-Standing Multi-Way Loudspeakers

These floor-standing loudspeakers feature a multi-way driver configuration for high audio fidelity. The speakers have a design with wood veneer and high-gloss black finishes.

Product Overview

Premium Audio Fidelity

These floor-standing multi-way loudspeakers are meticulously engineered to deliver exceptional audio precision for audiophiles and home theater enthusiasts. Featuring a refined vertical driver array, the system optimizes sound dispersion and imaging to ensure a truly immersive listening experience. The cabinets are crafted with a blend of wood veneer and high-gloss black finishes, specifically designed to minimize resonance and internal distortion.
