

Flow Meter for Liquid and Gas Measurement

This flow meter accurately measures liquid and gas flow rates. It is suitable for applications such as water distribution and chemical processing with its robust construction and flanged connections.

Product Overview

Industrial Flow Measurement Solution

This industrial flow meter is engineered for high-accuracy measurement of both liquid and gas flow rates across diverse industrial environments. Featuring a robust construction with secure flanged connections, it ensures reliability and durability in demanding conditions. The unit is equipped with a mechanical register for immediate, direct reading of accumulated volume, making it an essential tool for water distribution, chemical processing, and general industrial flow management.

Technical Specifications

Nominal Size	80 mm
Compatible Media	Liquid, Gas
Connection Type	Flanged
Display Mechanism	Mechanical Register

Applications

Suitable Industries

- Water Distribution
- Chemical Processing
- General Industrial
