

Fluid and Gas Control Ball Valve

This ball valve is designed for on/off control of fluids and gases. It features a robust construction with a metallic body, providing durability and resistance to corrosion.

Product Overview

High-Performance Flow Control

This industrial-grade ball valve is engineered for precise on/off control of various fluids and gases. Featuring a robust metallic body, it offers excellent durability and resistance to corrosive environments. Its quarter-turn lever handle design ensures rapid operation, while the smooth internal bore is optimized to minimize pressure drop and maximize flow efficiency.

Technical Specifications

Operation Mechanism	Quarter-turn lever handle
Connection Method	Threaded
Body Material	Metallic

Applications

Target Industries	Plumbing, HVAC, Industrial Processes
-------------------	--------------------------------------

Key Features

Performance Highlights

1 Quarter

Turn Time
