

Foldable Galvanized Steel Rolling Container

This galvanized steel rolling container has a capacity of 300kg and measures 720mm x 815mm x 1700mm. It is equipped with 6-inch casters and can be folded for space-saving storage.

Product Overview

Versatile Logistic Solution

This galvanized steel rolling container is engineered to streamline warehouse and distribution operations. Its collapsible design allows for significant space savings when not in use, while its robust construction ensures the secure transport of sensitive goods. Designed for flexibility, it serves as an essential tool for keeping consignments organized and mobile across various professional environments.

Key Features

Operational Benefits

- Collapsible design for efficient storage
- Enhanced security for sensitive goods
- Flexible warehouse organization
- Eliminates the need for frequent reloading
- Customizable design options available
