

Foldable USB Solar Charger

This portable solar charger utilizes multiple solar panels for efficient energy conversion. It is designed for charging USB devices during outdoor activities, camping, and in emergency situations.

Product Overview

High-Efficiency Portable Power

This foldable USB solar charger is engineered for professional and personal use in outdoor, camping, and emergency scenarios. It utilizes high-efficiency solar panels to ensure reliable energy conversion, housed within a durable, weather-resistant fabric casing. With its lightweight and compact folding design, it provides an essential, portable power solution for maintaining USB device operation in off-grid environments.

Technical Specifications

Recommended Use Cases

- Outdoor activities
- Camping expeditions
- Emergency preparedness
- Off-grid power supply

Connectivity

USB Port

Key Features

Foldable Design, Weather-Resistant, Lightweight, Portable, USB Integrated
