

Folding Auto Body Panel Painting Stand

Folding automotive painting stand designed for holding car bumpers, doors, hoods, and other body panels during painting and repair processes. It features a sturdy metal frame with adjustable supports and a compact folding design for easy storage and transport.

Product Overview

Professional Auto Body Painting Stand

This folding automotive painting stand is engineered to securely hold car bumpers, doors, hoods, and various body panels during repair and refinishing processes. Its sturdy metal construction provides a stable work platform, which helps ensure high-quality paint application and minimizes the risk of surface damage. Designed for efficiency and convenience, the stand features a compact folding mechanism that allows for easy transport and space-saving storage in professional workshops.
