

Folding Electric Bicycle with Integrated Lights

This electric bicycle features a folding frame, making it ideal for storage and transport. It comes equipped with a rear rack and integrated lights for enhanced practicality.

Product Overview

Compact Urban Mobility

This versatile folding electric bicycle is engineered for convenience, featuring a lightweight alloy step-through frame that simplifies mounting and dismounting. Designed for urban environments, it comes fully equipped with integrated lighting, fenders, and a rear utility rack for maximum practicality. The portable folding design allows for seamless storage and transportation, making it an ideal solution for professionals navigating city commutes.
