

Folding Electric Bike with Hidden Battery

This folding electric bike is equipped with a hidden battery and a 250W motor. Its folding design allows for easy storage and transportation, making it suitable for urban commuting and recreational use.

Product Overview

Versatile Folding Electric Bike

This folding electric bike is engineered for urban commuters and recreational riders seeking a blend of performance and portability. Featuring a hidden lithium battery and a lightweight aluminum alloy frame, it offers a sleek aesthetic without compromising on power. Its compact folding design ensures easy storage in office spaces or transport in vehicle trunks, making it an ideal solution for modern city mobility.

Performance Metrics

Key Performance

25 km/h
Max Speed

30 km
Endurance Range

120 kg
Max Load

Power System

Motor Power	250 W
Battery Specification	36V 7.8AH Lithium Iron (Hidden)
Charging Duration	3-5 hours
Controller	DC 36V dual mode controller

Build & Design

The folding frame and fat tire design provide stability across various urban terrains while remaining highly portable.

Instrument Display

LED Display

Frame Material

Aluminium Alloy 6061

Tire Size

20 inch * 4.0 Fat Tires

Braking System

Front and rear disc brakes

Key Features

Foldable, Hidden Battery, Fat Tires, Sport Design
