

Folding LED Illuminated Magnifier with Scale

This precision folding magnifier integrates LED illumination for enhanced clarity. Its compact design incorporates a calibrated scale for accurate measurements in various applications.

Product Overview

Precision Inspection Tool

This folding LED illuminated magnifier is engineered for high-precision tasks requiring detailed inspection and measurement. Featuring a high-quality optical lens combined with integrated LED lighting, it ensures superior clarity and visibility in various lighting conditions. Its compact, foldable design enhances portability, while the integrated calibrated scale on the base allows for accurate dimensioning, making it an essential tool for electronics, jewelry, printing, and quality control professionals.

Technical Specifications

Illumination

LED

Design Features

Folding, Portable, Calibrated Scale

Applications

Common Applications

- Electronics Inspection
- Jewelry Assessment
- Printing Quality Control
- General Precision Measurement
