

Folding Pruning Saw with Curved Blade

This folding pruning saw has a curved blade with hardened teeth for efficiently cutting branches and limbs. Its ergonomic handle provides a comfortable, secure grip, and the folding design ensures safe, compact storage.

Product Overview

Professional Folding Pruning Saw

This folding pruning saw is engineered for professional gardening and landscaping applications. It features a high-performance curved blade with hardened teeth designed to deliver clean, efficient cuts through branches and limbs. The compact, foldable design ensures safety during transport and storage, while the ergonomic handle provides the control needed for repetitive pruning tasks.

Technical Specifications

Design & Ergonomics

- Folding mechanism for compact storage
- Ergonomic handle for secure grip

Blade Characteristics

Curved Blade, Hardened Teeth

Application

Primary Applications

Gardening • Landscaping • General Pruning
