

Food and Beverage Ingredient Packaging Machine

This machine is designed for sealing bags of granular and powdered ingredients. It ensures containment and preservation of contents for bulk handling in the food processing sector.

Product Overview

Industrial Packaging Solution

This specialized packaging machine is engineered for the efficient handling and sealing of granular and powdered food and beverage ingredients. Designed for high-volume industrial applications, it ensures secure containment and preservation of bulk materials. The system is optimized for consistent performance, supporting standard bulk packaging formats essential for cereal and food processing supply chains.

Packaging Specifications

Bag Capacity	30 KG
Packaging Type	Granular, Powdered, Flexible Plastic

Operational Metrics

Format	BAGS/CTN
