

Food and Beverage Processing Machinery

This machinery is designed for processing food and beverages. It supports various applications within the food and beverage industry.

Product Overview

Precision Cutting Solution

This versatile power tool is engineered for high-accuracy crosscuts and miter cuts in wood processing applications. Featuring a robust circular saw blade mounted on a pivoting arm, it allows for precise angular adjustments. Equipped with comprehensive safety features including a clear blade guard and a secure workpiece fence, it is designed for demanding construction and woodworking environments.

Technical Specifications

Safety Features

- Clear blade guard
- Workpiece alignment fence

Cutting Options

Adjustable Bevel • Adjustable Miter

Tool Type	Miter Saw
Application	Woodworking, Construction
