

Food and Cereal Coating and Mixing Drum

This machinery is designed for processing food, beverages, and cereals. It features a cylindrical drum for mixing, coating, or roasting, supported by a sturdy frame with a motor and control panel.

Product Overview

High-Efficiency Processing Drum

This industrial-grade coating and mixing drum is engineered for consistent processing of food, beverages, and cereals. Constructed with high-quality stainless steel, it ensures optimal hygiene standards and long-term durability in demanding food processing environments. The unit features a robust drive system and integrated hopper, making it a reliable solution for mixing, coating, or roasting applications.

Technical Specifications

Key Features

- Integrated material input hopper
- Rotary drum processing mechanism
- Side-mounted control panel
- Heavy-duty blue-painted support frame

Construction Material	Stainless Steel
Primary Applications	Food Processing, Cereal Coating, Mixing, Roasting, Beverage Processing

Performance Metrics
