

# Forcible Entry Fireman's Axe

This fireman's axe is designed for forcible entry and rescue operations. It features a durable steel head for chopping and prying, and a strong fiberglass handle for a secure grip and reduced vibration.

## Product Overview

### Professional Forcible Entry Tool

Designed specifically for demanding rescue operations and emergency situations, this fireman's axe is an essential tool for rapid entry and demolition. It features a robust steel head engineered for both chopping and prying tasks, ensuring versatility in the field. The high-visibility handle is constructed from durable fiberglass, providing a secure, shock-absorbent grip that minimizes vibration during heavy-duty use.

## Technical Specifications
