

Forged Fixed Flange for Crane Applications

This large diameter forged fixed flange is specifically designed for crane applications. It provides a secure and reliable connection point, offering exceptional strength and durability under demanding operational conditions.

Product Overview

Forged Fixed Flange for Crane Systems

This large-diameter forged fixed flange is engineered specifically for demanding crane applications. Constructed from high-quality forged material, it provides exceptional strength and durability under heavy-duty operational conditions. The robust design includes precisely machined bolt holes to ensure accurate installation and reliable structural support.

Technical Capabilities

Manufacturing Capacity

9000 mm Max Outer Diameter	40 tons Max Weight	800 mm Max Thickness	1500 mm Max Height
--------------------------------------	------------------------------	--------------------------------	------------------------------

Outer Diameter Range	700 mm to 9000 mm
-----------------------------	-------------------

Design Features

Construction Features

Forged Material • Seamless Rolled Ring • Machined Bolt Holes

Flange Type	Fixed
Primary Applications	Crane Systems, Heavy-duty Lifting, Structural Support
