

# Forged Steel Garden Hoe Head with Circular Socket

This gardening hoe head is made from forged steel. It features a pointed blade design and a circular socket for handle attachment, making it suitable for cultivating, tilling, and weeding.

## Product Overview

### Professional Forged Garden Hoe Head

This high-quality garden hoe head is crafted using a single-piece forging process, ensuring superior durability and strength for demanding agricultural tasks. Its circular socket design allows for secure handle attachment, making it a reliable tool for professional cultivation and weeding. Designed for efficient soil penetration, this tool is an essential asset for any landscaping or gardening kit.
