Overview

High-Performance Ricardo Series Diesel Engine

This four-stroke, water-cooled diesel engine utilizes direct injection and high-speed combustion technology. Designed for reliability and economy, it offers high power output and easy starting capabilities in temperatures down to -10°C. With a first overhaul period of 8,000 hours, it provides a dependable and durable solution for industrial and commercial applications.

Model Specifications

Model	Bore (mm)	Stroke (mm)	Disp (L/cyl)
ZH495G	95	115	3.26
ZH495ZG	95	115	3.26
ZH4100G	100	115	3.61
ZH4100ZG	100	115	3.61
R4105P	105	125	4.33
R4105ZP	105	125	4.33

Engine Configuration

In-Line, 4-Cylinder, Four-Stroke, Water-Cooled, Direct Injection

Applications

PROJECT

UN Project

Telecom

stone crusher

Residential building

Cement Tanker

loader

hospital-building

Bank-building

Proven performance in diverse settings, including telecom, stone crushing, and emergency power systems.

Recommended Applications

- Power Generation
- Marine Power Systems
- Agricultural Machinery
- Construction Equipment
- Stationary Power
- Emergency Backup Systems
