

Four Post Parking Lift for Space Saving

This four-post parking lift provides a safe and efficient solution for increasing parking capacity. It features robust steel construction and a durable powder-coated finish, ensuring long-lasting performance.

Overview

Professional Four-Post Parking & Service Lift

This heavy-duty four-post lift is designed for professional automotive service centers, car 4S shops, and space-saving parking applications. It features a robust hydraulic system with integrated safety mechanisms, including mechanical locks and overload protection, ensuring reliable operation for vehicle maintenance and storage. With adjustable runways and a 3600 kg lifting capacity, it accommodates a wide variety of vehicle sizes while maintaining high safety standards.
