

Four-Tier Steel Shelving Unit

This shelving unit is constructed from durable steel with a silver finish. Shelf heights are adjustable, making it ideal for organizing tools, equipment, and supplies in warehouses, garages, and workshops.

Overview

Industrial Heavy-Duty Storage Solution

This four-tier storage shelving rack is engineered for demanding industrial and commercial environments, offering a robust solution for organizing warehouse, garage, or office materials. Constructed from high-quality cold-rolled steel and durable MDF boards, it ensures long-term reliability and strength. With a significant load capacity and adjustable design, this unit provides a versatile and efficient storage system for heavy equipment and supplies.
