

Frankfurt Abrasive Stone for Grinding and Polishing

This abrasive stone is designed for grinding and polishing applications. Its rectangular shape and coarse surface enable efficient material removal and surface refinement on stone, concrete, and similar materials.

Product Overview

Professional Grinding & Polishing Solution

This Frankfurt abrasive stone is engineered for high-efficiency material removal and surface refinement. With its durable construction and coarse abrasive surface, it is specifically designed to handle demanding tasks on stone, concrete, and other hard materials. Its versatile design makes it an essential tool for achieving precise shaping and smoothing in various manual grinding and polishing applications.

Technical Specifications

Shape	Rectangular
Surface Texture	Coarse Abrasive

Application & Usage

Primary Functions

- Material removal
- Surface refinement
- Shaping
- Smoothing

Tool Compatibility

Manual Tools

Compatible Materials	Stone, Concrete, Hard Materials
