Product Overview

Professional Water Dispensing Solution

This freestanding water dispenser is engineered for reliable performance in both home and office environments. It features high-quality 304 stainless steel tanks and durable copper pipe evaporators to ensure longevity and hygiene. With efficient heating and cooling capabilities, it provides instant access to temperature-controlled water, supported by built-in electrical safety protections.

Performance Metrics

Heating Capacity

95 °C

Max Temperature

5 L/h

Flow Rate

Cooling Capacity

6 °C

Min Temperature

2 L/h

Flow Rate

Technical Specifications

Power Consumption

Function	Rating	Unit
Heating Power	500	W
Cooling Power	80	W
Cooling Current	0.8	A

Cooling System Details

- Compressor or Electronics cooling options
- Copper pipe evaporator
- Refrigerant: R134a/32g
