

Frosted Matte Screen Protector Film

This frosted film screen protector is designed for mobile phones, providing a matte finish that reduces glare and fingerprints. It offers scratch resistance and maintains touch sensitivity.

Product Overview

Professional Matte Protection

This frosted film screen protector is engineered specifically for mobile devices, offering a high-quality matte finish that effectively minimizes glare and reduces visible fingerprints. The protector maintains excellent touch sensitivity while providing robust scratch resistance to extend the longevity of the device display. It is precision-cut to ensure a perfect fit, allowing for an effortless installation process that protects the screen without compromising clarity.
