

Fruit and Vegetable Purifier

This fruit and vegetable purifier uses advanced purification technology to remove harmful substances. It features a user-friendly design and multi-stage purification for thorough decontamination.

Product Overview

Advanced Purification Technology

This fruit and vegetable purifier utilizes advanced technology to effectively remove pesticide residues, bacteria, and other harmful substances from produce surfaces. Designed for modern kitchens, it features a user-friendly control panel and a compact footprint that fits easily on any countertop. The multi-stage purification process, combining ozone sterilization and ultrasonic cleaning, ensures thorough decontamination for safer food preparation.

Technical Specifications

Key Features

- Food-grade container material
- Self-cleaning function
- Energy-efficient operation
- Compact countertop design

Maintenance

Self-cleaning

Model Number

FY08JS-BJ(GZ)

Purification Methods

Ozone Sterilization, Ultrasonic Cleaning
