

Fuel Dispensing Unit with Two Products and Four Nozzles

This fuel dispensing unit offers two product options and four nozzles for versatile fuel delivery. It is equipped with a digital display and separate hoses and nozzles for each fuel type.

Product Overview

High-Efficiency Fuel Dispensing Solution

This fuel dispensing unit is designed for high-traffic environments, providing a robust and reliable solution for multi-product fuel delivery. Equipped with four nozzles and support for two distinct fuel types, it ensures streamlined operations and minimized wait times. The unit features an intuitive digital interface for precise monitoring of volume, sales, and pricing, housed in a durable enclosure built for performance.

Technical Specifications
