Product Overview

High-Performance Filtration

This fuel filter cartridge utilizes advanced filtration technology to effectively remove dirt, water, and harmful contaminants from fuel systems. By preventing these particles from reaching the engine, it ensures optimal performance and extends the longevity of critical engine components. Designed with high-quality filtration media, this element offers superior dirt-holding capacity and an extended service life for reliable operation.

Technical Specifications

Design Features

- Pleated filtration media for increased surface area
- Enhanced filtration capacity
- Easy installation and replacement design

Compatibility & Standards

1018

Model Reference

20 S04

Batch/Series Code

Filtration Capabilities

Dirt Removal, Water Separation, Contaminant Filtration
