Product Overview

High-Performance Diesel Injection

This Common Rail diesel injector is engineered for precision fuel delivery and optimal engine performance in heavy-duty applications. Designed to meet or exceed OEM specifications, it ensures efficient combustion, improved fuel economy, and reduced emissions. Constructed from durable materials, it provides a reliable solution for maintaining engine longevity and reliability.

Technical Identification

Injector Type

Common Rail • Diesel

Part Number

0 445 120 067

Compatibility

Compatible Engine

210 Ec

Engine Series

Component Matching

| Component Type | Reference Number |
|-----------------|------------------|
| Valve Component | F 00R J01 479 |
| Nozzle | DLLA146P1581 |

Performance Features

Key Benefits

- Optimal fuel delivery for engine efficiency
- Precise fit and function for easy installation
- Durable construction for extended service life
- Contributes to reduced vehicle emissions
- Enhanced fuel economy
