Product Overview

Advanced Climate Control Solution

This full DC frequency conversion split air conditioner is engineered for superior energy efficiency and rapid climate control. Designed for versatile household use, the unit provides both powerful cooling and fast heating capabilities. Its intelligent fan technology ensures optimal performance and a consistently comfortable indoor environment throughout the year.

Technical Specifications

Technology	Full DC Frequency Conversion
Configuration	Split-type
Functions	Cooling, Heating, Intelligent Fan

Performance Metrics

Performance Highlights

1 High

Energy Efficiency

1 Fast

Heating Speed

Application

Primary Application	Residential / Household
