

Full Face Protective Gas Mask with Filter Canister

This protective gas mask is designed for respiratory safety in hazardous environments. It features a full-face design with dual lenses and a filter canister for removing toxic particles.

Product Overview

Professional Respiratory Protection

This full-face protective gas mask is engineered for reliable respiratory safety in hazardous environments. Featuring a high-visibility dual-lens design and a flexible corrugated hose connection, it ensures both comfort and operational clarity for the wearer. The integrated cylindrical filter canister is designed to effectively neutralize toxic gases and airborne particles, making it an essential tool for industrial safety, emergency response, and specialized operations.

Design & Build

Visibility

Dual Eye Lenses • Enhanced Visibility

Mask Configuration	Full Face
