

Full Suspension Mountain Bike

This full suspension mountain bike is designed with a robust frame for off-road adventures. Its front and rear suspension systems provide a smoother ride on uneven terrain, while knobby tires enhance grip.

Overview

Built for Off-Road Performance

This full-suspension mountain bike is engineered for rugged terrain, featuring a durable high-tensile steel frame with TIG welding for enhanced strength. Equipped with both front and rear suspension systems, it effectively absorbs shocks to provide a smoother, more controlled ride on uneven trails. With 21-speed gearing and reinforced V-brakes, this bike offers the versatility and stopping power required for demanding downhill and off-road conditions.

Frame & Geometry

Frame Material	High-tensile steel (Hiten)
Welding	TIG welded
Frame Size	18 inch

Drivetrain & Components

Gearing	21-speed non-index
Crankset	Steel, plastic coated cranks with steel black chainring

Suspension & Brakes

Suspension System	Front Suspension, Rear Suspension
Brake System	Reinforced steel V-brake (Front & Rear)

Wheels & Tires

Wheel Size	26 inch
Tire Width	2.35 inch
Rim Construction	Alloy double wall

Design & Aesthetics

Available Colors

Titanium • Copper • Black/White • Silver/Black
