

Full Suspension Mountain Bike

This is a full suspension mountain bike designed for off-road use. It is equipped with front and rear fenders, knobby tires, and a multi-speed drivetrain.

Overview

Built for Trail Performance

This full suspension mountain bike is engineered for versatility and comfort on varied terrain. Featuring a robust frame design with both front suspension forks and a rear shock, it effectively absorbs impacts to provide a smooth ride. Equipped with multi-speed gearing and reliable braking systems, this bicycle is ready for demanding off-road adventures.
