

Furniture Injection Mold

This precision-engineered mold is designed for creating furniture components. It ensures accurate dimensions and consistent quality in furniture production.

Product Overview

Precision Furniture Injection Molds

These high-precision injection molds are engineered specifically for the efficient production of furniture components, including chairs, tables, and stools. Designed for consistency and durability, they ensure accurate dimensions across every production cycle. These tools provide manufacturers with the versatility needed to create high-quality, reliable furniture pieces at scale.

Technical Specifications

Available Mold Types

- Chair Mould 75
- Chair Mould 76
- Chair Mould 77
- Chair Mould 78
- Table Mould 79
- Stool Mould 256

Primary Applications

Chair Manufacturing, Table Production, Stool Production, Furniture Components
