Product Overview

High-Pressure Cleaning Precision

This G1/4 quick-connect nozzle set is engineered for high-performance pressure washing applications, including professional vehicle cleaning and surface maintenance. Constructed with a robust stainless steel core, these nozzles offer exceptional durability and corrosion resistance under demanding conditions. The color-coded design ensures rapid identification of spray patterns, allowing for precise control and efficiency during varied cleaning tasks.

Technical Specifications

Maximum Pressure

300 bar

Max Operating Pressure

Max Working Temperature

80 °C

Fitting Type

G1/4 Quick Connect

Configuration Options

Available Nozzle Configurations

- 4-color set (Red, Yellow, Green, White)
- 5-color set (Red, Yellow, Green, White, Black)
- 7-color set (Red, Yellow, Green, White, Black, Blue, Pink)

Compatibility Options

4-color + 5th gear universal joint, 5-color + 5th gear universal joint, 7-color + 5th gear universal joint, 4-color + 7th gear universal joint, 5-color + 7th gear universal joint, 7-color + 7th gear universal joint
