Product Overview

High-Strength G80 Alloy Steel Load Chain

This G80 load chain is engineered for demanding lifting and rigging applications, constructed from premium alloy steel to ensure durability and reliability under heavy loads. Each link undergoes specialized surface treatment to provide exceptional resistance against corrosion, rust, and wear, ensuring a long service life in industrial environments. Every link is stamped with the G80 grade mark to verify compliance with quality standards, guaranteeing safety and performance for professional lifting, securing, and tie-down tasks.

Technical Specifications

Grade

G80

Available Diameters
