

Galvanized Dee Shackle

This galvanized dee shackle is designed for lifting and connecting applications in marine and industrial environments. Constructed from high-strength steel, the shackle offers reliable performance and corrosion resistance.

Overview

Professional Grade Galvanized Dee Shackle

This Galvanized JIS Dee Shackle is engineered for demanding lifting and connecting applications in both marine and industrial environments. Constructed from high-strength steel, it provides exceptional durability and reliable corrosion resistance for long-term use. Designed to integrate seamlessly with wire rope, chain, and various rigging hardware, this shackle is an essential component for shipbuilding, offshore platforms, and heavy-duty rigging operations.

Technical Specifications

Surface Finish

Galvanized

Material

High-strength steel

Closure Type

Screw pin

Standards Compliance

JIS

Applications

Industry Applications

- Shipbuilding
- Offshore Platforms
- General Rigging
- Marine Construction

Compatible Hardware

- Wire Rope
- Chain
- Rigging Hardware
