

Galvanized Pipe Clamp with Threaded Connection

This pipe clamp is constructed from galvanized metal for durability and corrosion resistance. It is designed with a central threaded connection point for mounting or suspending piping systems.

Product Overview

Professional Pipe Support Solution

This galvanized pipe clamp is engineered for secure and reliable mounting in plumbing, hydraulic, and industrial piping systems. Its robust design features two semi-circular metal bands that are easily joined and tightened with bolts, ensuring a stable grip on pipes or tubes. Equipped with a central threaded connection point, it offers versatile installation options for suspension or fixed mounting.

Technical Specifications

Material Finish

Galvanized Steel • Corrosion Resistant

Design Features

- Two-piece semi-circular band design
- Bolt-tightening mechanism
- Central threaded connection point

Applications

Suitable Industries

Plumbing, Hydraulics, Industrial Piping
