

Galvanized Steel Razor Wire for Security Fencing

This high-tensile razor wire is designed for perimeter security. The sharp, piercing barbs made from galvanized steel strip are tightly coiled around a core wire.

Product Overview

High-Tensile Security Fencing Solutions

This galvanized steel razor wire provides a formidable physical barrier against intrusion, making it an ideal choice for high-security environments like prisons, military installations, and industrial sites. Available in both crossed and single coil configurations, the product features sharp, piercing barbs formed from steel strips. Its robust design offers enhanced deterrence and superior resistance compared to traditional fencing methods.

Material and Finish

Available Materials

Hot dipped galvanized, Electro galvanized, Stainless steel

Product Configuration
