Overview

High-Quality Galvanized Steel Sheets

These galvanized steel sheets are engineered for superior corrosion resistance and durability, making them an ideal choice for demanding environments and various industrial applications. Featuring a versatile thickness range and multiple international standard compliance options, they provide consistent performance for fabrication, stamping, and welding projects. Designed to meet diverse requirements, these sheets offer a reliable solution for both roofing and automotive aftermarket service needs.

Technical Specifications

Thickness Range	0.13 mm
Width Range	600-1500 mm
Available Grades	SGCC, CGCC, SGCD, SPCC, DX51D, DX52D, DX53D

Standards & Compliance

Compliance Standards

AISI • ASTM • BS • DIN • GB • JIS

Applications

Common Applications

- Roofing sheets
- Automotive parts
- Aftermarket service components
- Fabrication and stamping
- Welding projects
