

Galvanized Steel Square Conduit Box

This galvanized steel square conduit box is designed for electrical wiring applications. It is constructed from durable steel and features multiple knockouts and a grounding screw for secure installation.

Product Overview

Professional Electrical Solutions

This 4-inch square conduit box is engineered for reliable electrical installations in walls and ceilings. Constructed from durable pre-galvanized steel, it provides a robust housing for lighting fixtures, switches, and various outlet devices. Its drawn construction ensures structural integrity, making it an ideal choice for splitting conductor runs in multiple directions.
