

# Garment Refreshing and Sterilizing Appliance

This appliance is designed to refresh and sterilize clothing. It utilizes steam and ultraviolet (UV-C) technology to eliminate bacteria, mites, and odors from various garments.

## ADDITIONAL IMAGES

## Product Overview

### Intelligent Garment Care Solution

This advanced garment refreshing and sterilizing appliance offers a comprehensive one-stop solution for clothing maintenance. By combining steam and UV-C disinfection with intelligent de-wrinkling and low-temperature drying, it restores the original texture of fabrics while ensuring thorough hygiene. Its compact, user-friendly design makes it suitable for a wide variety of items, including clothing, accessories, bags, and toys.

## Key Features

### Core Functions

- Steam & UV-C Disinfection
- Smart De-wrinkling
- Low-temperature Drying
- Odor Removal
- Aroma Infusion

### Sterilization Targets

Staphylococcus aureus, Escherichia coli, Mites

## Technical Specifications

### Drying Technology

Low temperature drying with annular air circulation

### Disinfection Method

Dual way: Steam + Ultraviolet Ray (UV-C)

## Usability

### Compatible Items

Clothing • Accessories • Bags • Toys

### Operation

Single tap plug-and-play
