

Gasoline Engine Compactor

This construction machinery is designed for soil compaction. It can be configured with either a Robin Ey20 5.0HP engine or a HONDA copy 168F 5.5HP engine.

Product Overview

High-Performance Compaction Solutions

This series of gasoline engine compactors offers versatile options for construction and landscaping projects. Designed for efficiency and portability, these units are available with various engine power ratings to suit specific operational requirements. Each model is engineered for durability and ease of transport, making them ideal for professional site preparation.

Technical Specifications

Engine Configuration Table

Engine Type	Power (HP)	Net Weight (kg)	Gross Weight (kg)
Standard Gasoline	5	21	22
High-Output Gasoline	5.5	20	21
Compact Gasoline	2	5	6

Packaging Dimensions

- Standard Frame A: 515 x 390 x 510 mm
- Standard Frame B: 460 x 440 x 485 mm
- Compact Unit: 282 x 354 x 345 mm
