

Gasoline Engine High-Pressure Cleaning Machine

This portable cleaning machine features a gasoline engine and high-pressure pump. It is equipped with a hose reel and wheeled frame for convenient storage, deployment, maneuverability and transportation.

Overview

Industrial Cleaning Power

This portable high-pressure cleaning machine is engineered for demanding industrial and commercial environments. Powered by a robust gasoline engine, it delivers consistent high-pressure performance to effectively remove stubborn dirt and grime. Designed for mobility and convenience, the unit features a wheeled frame for easy transport and an integrated hose reel for streamlined operation.

Technical Specifications

Power Source	Gasoline Engine
Primary Application	Industrial, Commercial

Design & Mobility

Mobility Features

- Wheeled frame
- Integrated hose reel
