

Gasoline Engine Water Pump, 1-Inch Outlet, 8 m³/h

This self-priming centrifugal pump is powered by a gasoline engine. It is designed for efficient water transfer in agricultural, construction, and emergency applications.

Product Overview

Professional Gasoline Water Pump

The QGZ-139 is a compact and highly portable self-priming gasoline engine water pump designed for versatile liquid transfer tasks. Ideal for agricultural irrigation, site drainage, and emergency water management, this unit delivers consistent performance in a lightweight 9kg frame. Engineered for reliability, it features a 31cc displacement engine capable of handling up to 8 cubic meters per hour.

Technical Performance

Key Performance Metrics

8 m³/h

Flow Rate

30 m

Max Lift

8 m
