

Gasoline Engine Water Pump for Agriculture and Construction

This water pump is powered by a gasoline engine and mounted on a protective frame. It is equipped with a flexible hose and cylindrical pump head for efficient water transfer in agricultural and construction applications.

Product Overview

High-Efficiency Gasoline Water Pump

This portable gasoline-powered water pump is engineered for heavy-duty performance in agricultural and construction environments. It features a robust protective frame that ensures durability and ease of transport across demanding work sites. With its specialized pump head and flexible hose connectivity, this unit provides reliable water transfer solutions for professionals requiring power and mobility.

Technical Specifications

Engine Type	Gasoline
Suitable Applications	Agriculture, Construction, Water Transfer

Key Features

Construction Details

- Durable protective steel frame
- Portable, ergonomic design
- High-capacity cylindrical pump head
- Compatible with flexible heavy-duty hoses

Market Readiness

Portable • Heavy-Duty • Field-Ready
