

Gasoline Generator

This gasoline generator provides a portable power source. It is engineered for reliable performance in various applications.

Overview

Commercial Cooling Solution

This robust commercial air conditioning unit is engineered for high-capacity cooling in large-scale industrial and commercial environments. The system features a fully integrated design, combining the compressor, condenser, and evaporator into a single, durable outdoor unit. Equipped with multiple high-efficiency cooling coils and a top-mounted fan, it ensures reliable heat dissipation and consistent performance for demanding applications.

Technical Specifications

Key Features

- Integrated compressor, condenser, and evaporator
- Multiple cooling coils
- Top-mounted fan system
- Robust construction

System Type	Packaged Outdoor Unit
Application	Commercial, Industrial
