

Gasoline Generator, 5000W

This gasoline generator provides reliable power for various applications. It features multiple AC outlets for connecting devices and tools, along with safety features such as circuit breakers and a low-oil shutdown system.

Overview

Compact High-Performance Power

This 5000W gasoline generator features a new compact design that matches the footprint of smaller 2KW models, significantly enhancing storage and transport logistics. It is engineered with a 100% copper alternator for improved temperature regulation and a long service life, supported by a 15L fuel tank for extended run times. Ideal for diverse professional applications, it offers flexible configuration options including multi-phase power, remote start, and integrated CO alarm safety systems.

Technical Specifications

Rated Power Output

5000 W

Rated Power

Fuel Tank Capacity	15 L
Alternator Material	100% Copper
Total Harmonic Distortion (THD)	< 3%

Features & Configurations

Optional Features	Three-Phase, DC/USB Output, Remote Start, ATS (Automatic Transfer Switch), CO Alarm, Square Alternator
-------------------	--

Logistics & Design

Container Loading (40HQ)	380 units
Physical Footprint	Equivalent to 2KW model
