

Gasoline Generator for Power Distribution

This gasoline generator is designed for electric power transmission and distribution. It features a durable frame with wheels for portability, an electric starting system, and multiple power outlets for versatile use.

Overview

Reliable Power Solution

This gasoline generator is engineered for versatile power distribution, making it an ideal choice for home backup, construction sites, and outdoor events. It features a durable, portable frame equipped with wheels for easy transport and an electric starting system for user-friendly operation. Designed for consistent performance, it provides reliable power delivery across various demanding applications.

Performance Metrics

Max Output

6.8 kVA

Max Output

5000 W

Surge Wattage

Power Ratings

Metric	Value	Unit
Engine Power	4000	W
Rated Power	3000	W

Features

Suitable Applications

- Home Backup
- Construction Sites
- Outdoor Events
- General Power Distribution

Key Features

Electric Start, Portable Frame, Wheeled Design, Gasoline Powered
