

Gasoline Generator Welder

This gasoline generator welder is a versatile and portable power solution for welding and electricity generation. It delivers AC power for running tools and appliances, along with DC welding capabilities for metal fabrication and repair.

Product Overview

Versatile Power Solution

The 210 Gasoline Generator & Welder is a dual-purpose unit designed for both welding and electricity generation. It features a robust gasoline engine, making it a reliable power source for construction sites, workshops, and emergency backup needs. With a durable frame and integrated wheels, this unit offers excellent portability for demanding field applications.

Technical Specifications

Available AC Output Options

- 1000W
- 2000W
- 3000W
- 4000W

AC Voltage Output

AC 220V

Welding Type

DC Welding

Features

Suitable Applications

Construction Sites • Workshops • Emergency Backup

Key Features

Portable, Dual-Purpose, Gasoline Powered, Wheel-Mounted
